

**Quality Control Maps of Total Cloud Cover,
Cloud Radiative Effects and Parosol Reflectance
- Nam for Euclipse Project 2012**

These maps are for 'first glance' purposes to help ensure quality control of models before more elaborate studies. The model is compared to total cloud cover from CALIPSO GOCCP observations, cloud radiative effects from CERES and Parosol reflectance.

Quality Check IPSL5B AMIP 2008 (comp. Monthly)
